1.5 Installation accessories

Tube Hanger Support Recommendations:

Processing lines are not to be rigidly anchored to equipment. They must be allowed to float. Temperatures can cause expansion and contraction - if tube hanger supports are mounted incorrectly, distortion and possibly leakage of the lines could occur.

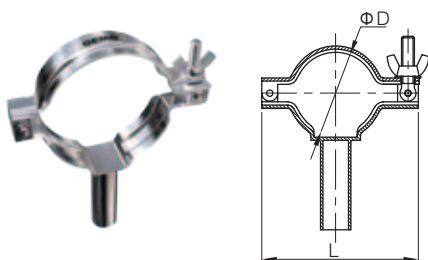

Proper Tube Hanger Support Installation:

Straight sections of tube need support every 10 feet. Support needs to be on each side of every valve (as close as possible to the connection). Additionally, a support needs to be at each change of direction.

EACH FITTINGS PACKAGING HAS A BARCODE

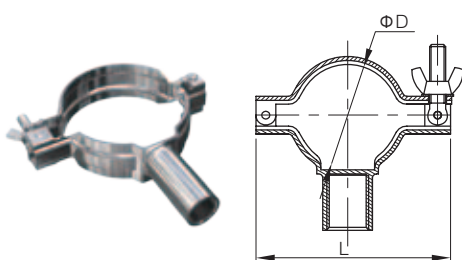

TH1-A Tubing Hanger

Basic Ordering Number: 4007

NO.	Size	D	L
